LATINX COVID OUTREACH

• LatinX Population makes up about 14.2% of State
• LatinX Population makes up about 38% of COVID Positive Rates
  – Oftentimes unable to work from home
  – Oftentimes have multigenerational families
  – Oftentimes live in high-density households

Two mailings will go out:
1-University of Utah Health Plans Members ~6,600
2-University of Utah Hospitals & Clinics Patients UP TO 18,000 Letters + 13,000 Emails
HOW TO ISOLATE A SICK HOUSEHOLD MEMBER WHEN HOUSEHOLD SPACE IS LIMITED

If you cannot provide a separate room and bathroom for a person who is sick with COVID-19, try to separate them from other household members. Try to isolate individuals with COVID-19 as much as possible, for at least 10 days and for 24 hours after fever and cough have resolved. If symptoms last longer than 10 days or worsen, seek medical attention.

Physical Distance
- Keep at least 6 feet (2 meters) from other people, especially close contacts.

Wash Hands and Avoid Touching
- Wash your hands with soap and water frequently or use an alcohol-based hand sanitizer.

What to Wear
- Wear a mask even when in close contact with others (within 6 feet).

Limit Caregivers
- Identify the person in the household who can best care for a sick family member.

Clean and Disinfect
- Clean and disinfect frequently touched surfaces in a separate bathroom. If that's not possible, wipe down surfaces in the bathroom before entering to clean and disinfect.

Limit Visitors
- Limit visitors to those who live in the household.

Avoid Close Contact in Shared Spaces
- Try to do the following before leaving a shared bathroom with someone who is sick:
  - Make sure the room has good air flow. Open a window and turn on a fan if available.
  - Plexiglass is not necessary, but can help.

CORONAVIRUS PREVENTION

To help prevent the spread of COVID-19 and other respiratory infections:

- Wash your hands with soap
- Stay home when you are sick
- Avoid physical contact
- Disinfect surfaces
- Wear mask
- Avoid touching your face
- Practice physical distancing

Use hand sanitizer

VIERNES
1 DE MAYO
6 PM MDT
MOBILE TESTING

• 2 mobile units
  – HCI mobile unit
  – Miller Foundation Diabetes Van
• Retrofitted as mobile COVID19 testing
• Have been to community “hot spots”
  – Utah State Fair Grounds
  – Essential businesses
COMMUNITY PARTNERS

• Senator Escamilla
• Representative Romero
• Consulate of Mexico Salt Lake City
• State Department of Multicultural Affairs
• Utah Department of Health
• Community Health Worker Coalition
• Refugee Resettlement Agencies
PUBLIC HEALTH MESSAGING

• Wash your hands
• Wear a mask
• Practice physical distancing
  – Work from home
  – Worship from home
• Safe quarantining in home with family
• Take your medications
COMMUNITY RESOURCES

• Community leaders tied into health committees/updates
• Mental health and crisis hotlines with interpretation
• DWS and Mutual Aid funds for unemployment, cash, transportation, food delivery and eviction assistance
• Translated flyers
NECESSARY ACTIONS

• Provide sick leave/unemployment for COVID19 positive patients
• Provide a safe place to quarantine
• Perform adequate contact tracing
• Use testing data to inform public health decision making.
• Provide more education materials in multiple languages/multiple media as updates happen
