UNRAVELING THE COMPLEXITY OF CHRONIC PAIN AND FATIGUE

This three-part Zoom workshop will provide a multidisciplinary approach to patients who present with chronic fatigue and widespread pain. Providers will broaden their knowledge regarding the underpinnings of symptoms, and gain tools allowing for earlier diagnosis, more effective clinical management, and improved patient outcomes.

MAY 13 – 15,
NOON – 1 PM (MDT) DAILY

COVID-19 RESOURCES

COVID-19 is creating a continually changing set of challenges for hospitals and clinics. To help providers and administrators provide the best patient care, University of Utah Health is pleased to share our resources. Visit our Partner Portal to find:

- Clinical education materials, including presentations by specialized providers
- Treatment guidelines, workflows, and testing criteria
- Visitor guidelines, and patient education materials

> Find all these resources at affiliate.uofuhealth.org

WEEKLY PROJECT ECHO SESSIONS WITH COVID-19 SPECIALISTS

For the past three weeks, infectious disease experts from University of Utah Health have joined Project ECHO to teach physicians and nurses "Everything You Ever Wanted to Know About COVID-19." These Zoom video conferences have been attended by upwards of 200 providers.

This series continues each Monday at noon (MDT). The meeting starts with in-depth presentation on a specific aspect of managing this virus in your practice. Following the presentation, attendees are given time to ask any and all questions about the virus.

We've also enjoyed specialized presentations on COVID-19 and Pregnancy, as well as COVID-19 and GI Manifestations.

See page 3 of this newsletter for additional information.
NATIONAL TRAUMA AWARENESS MONTH

May is National Trauma Awareness Month. Highlights include EMS Week, National Trauma Survivors Day on May 20th, and National Stop the Bleed day on May 21st.

Follow us social media, where we’ll send out injury prevention and trauma tips for the entire month.

The next Trauma Grand Rounds will be held by Zoom video conference on May 21 at 7am. The topic is Trauma Embolism and Workups, with a presentation by Keith Quencer, MD, Assistant Professor of Radiology.

UPCOMING TeleICU EVENTS

The TeleICU program offers 24/7 physician to physician consults with ICU intensivists and nurse to nurse telephone consults. In addition, we offer weekly live education on ICU topics. We are currently focusing on education related to caring for the COVID-19 patient population.

These offerings are for those with a current TeleICU contract. For more on these events, see the May schedule.

CRISIS STANDARDS OF CARE

Resources for Operating in Crisis Mode

The Crisis Standards of Care Guidelines, State Crisis Standards of Care Guidelines, and Pediatric CSC guidelines are all located in the Utah Crisis Standards of Care Guidelines on the home page. These may be helpful to those who are in contingency or crisis mode, and to those who are now faced with the challenge of caring for a patient population they would not normally care for due to limited beds in specialty facilities.

This site provides training for triage teams and other personnel crisis management. Click here to read more from the program coordinator.
